

"QCM" Clear Bow Retainer

Technical Bulletin

Highly Esthetic Clear Labial Bow Retainer

"I prefer the QCM wrap-around retainer because it meets my goal of being a functional, esthetic appliance." David W. Jackson, DDS, FAGD, IBO

QCM Bow from Johns Dental

This QCM Bow from Johns Dental also shows the optional "J" Star which signifies our insurance program for lost or damaged appliances.

Get the best of both worlds from a "QCM."

This highly esthetic retainer will keep your patients in compliance while maintaining your ortho treatment.

Patients of all ages will like the fact that they can maintain their improved smile while concealing the appliance.

You'll love it because of the increased patient acceptance and continued wear.

"My patients actually wear the QCM as instructed because there are no metal wires showing or blocking the occlusal surface which would interfere with chewing."

David W. Jackson, DDS, FAGD, IBO
