

Home Care Guide For Your ClearMet Partial

The only clear choice for partials.

Caring for your ClearMet

We recommend that you brush your new partial with dental toothpaste and water during your morning and evening tooth cleaning routine.

Please do not boil, microwave, or use a dishwasher to try and clean your partial.

Although it is not needed, you may ask your dentist to recommend a denture cleaner. Look for denture cleansers with the American Dental Association (ADA) Seal of Acceptance. Products with the ADA Seal have been evaluated for safety and effectiveness.

Why ClearMet is the Clear Choice

- Extremely Durable
- Simple to Adjust
- Stain Resistant—No Odors!
- Invisible
- Tooth Bearing
- Great Retention
- Add Additional Teeth—Quickly and Easily!
- Amazing Comfort

Testimonial

“I couldn’t afford implants and I had no other choice but to get a partial denture for my missing teeth. I have had a metal partial for a few years now so I immediately expressed to my dentist my fear of smiling and seeing a metal object in my mouth. I have had my new partial for almost a year now and I can’t believe how nice it is to not have to think before smiling. I would recommend the ClearMet partial to anyone needing a partial denture.”
